WORK EXPERIENCE

WordPress Developer

Nov 2023 – Present

Mycarehub

Remote

I developed core business processes, including a complex multi-step and multi-form system for NDIS participants and support workers intaking/registration for an Australian Company. I created dashboards for user management including account approval, reports and registers, including incident and complaint reports, feedback registers, participant risk registers, and complaint registers. Developed an SMTP component for email services and reminders, integrated Google Firebase for secure user login and registration, integrated Google Drive for centralized file uploads, created a custom PDF export functionality to automate document generation. Developed profiles for all account types, including profile pictures, ratings and reviews, and other details. Created a custom booking calendar with weekly and monthly views to show all booked activities.

WordPress Developer

May 2023 – Aug 2023

Freelance

Remote

I developed a comprehensive matrix-based multilevel marketing system integrated with an e-commerce storefront supported with user and membership management, store management, product and inventory management, matrix management, payments integrated with Paymongo, email notifications, and profiles

Lead Developer

Mar 2023 – Apr 2023

Freelance

Remote

I deployed a website for an international Ophthalmologist conference/symposium of more than 2500 registrants. Developed systems for login and registration, profile and account management, PayPal and PayMongo integration, abstract submission and management, admin dashboards, and email notifications.

Web Developer Intern

Apr 2022 – Dec 2022

JLCG (Apr 2022 - Jul 2022) Qadra Studio (Aug 2022 - Dec 2022)

Remote

I created responsive web pages for WordPress websites using Elementor or Bricks guided by Figma Designs. Jetpack was utilized for custom post types and adding dynamic content.

WordPress Developer

Dec 2022 – Apr 2022

Freelance

Remote
